

THE MEDIA TRUST

CONTINUOUS INSIGHT.

SOMETHING HAPPENED ALONG THE WAY TO RSA®

Digital vs. Physical

Beyond getting from point A to B, your RSA conference journey reveals the reality of data tracking activity via digital assets. The more active you are on websites and mobile apps, the more you expose information about your preferences. If not properly secured, this information can be leveraged by cyber criminals to target you. How are these digital properties securing user data? The same question can be asked of YOUR corporate websites and mobile apps.

THE MEDIA TRUST

Visit us in booth #3300 in the South Expo and ask us about the risks present in your corporate environment.
